

What is Python?

A Summary

- 🐍 Python is an **interpreted, object-oriented**, high-level programming language with dynamic semantics.
- 🐍 Python has high-level **built-in data structures** combined with dynamic typing and binding which makes it attractive for development.
- 🐍 Python's **simple to learn syntax** emphasizes readability!
- 🐍 Coders fall in  with Python because of increased productivity it provides since there is **no compilation** step.
